

Join us as we strive to improve the health of every patient.

At Memorial Hermann, we believe in providing patients with reliable, accessible care.

That's why we prioritize patient care during your entire care journey. The Meds-to-Beds Program at Memorial Hermann is available to you and features a pharmacy team member who delivers your medications right to your bedside. The Program also connects you to a pharmacist who can answer any questions about your prescriptions before you're discharged from the hospital. This Program coordinates with your insurance provider to bring the most cost-effective solution to you and gives you the option to refill your other medications after discharge.

Advancing health. Personalizing care.

Meds-to-Beds Program:

A Convenient Pharmacy Service for Our Patients

Frequently Asked Questions About the Meds-to-Beds Program:

Q: How may I take advantage of this Program?

A: Your clinical team will advise you if you are eligible to take part in Meds-to-Beds. You may opt out if you choose. However, patients tend to appreciate all the benefits and continue to take advantage of this convenient, quality service.

Q: Are all insurances accepted?

A: We accept most insurances with a few exceptions.

Q: Do I have to pay for the medications before I leave?

A: You will be responsible for your co-pay, just like you would if visiting an outside retail pharmacy.

Q: What if I can't afford my medications?

A: Our pharmacy and case management teams will help to identify resources to address your medication costs.

Q: What if I need a refill?

A: We will handle refills that were sent to us during your hospital stay, and we will be happy to fill any prescriptions you have at other retail pharmacies as well. Just let our pharmacist know so we can have these prescriptions routed to Memorial Hermann Retail Pharmacies.

Q: Will this service prevent me from refilling medication at my local pharmacy?

A: Where you refill prescriptions is up to you. We can either forward your prescriptions to your preferred outside pharmacy, or we can happily continue filling your prescriptions. The choice is yours.

Q: What if I have questions about my medications?

A: It is important to understand your medications, including any new ones you started taking during your hospital stay. When our pharmacy team member delivers your medications to your bedside, let them know if you have any questions so they can have a pharmacist call you before you are discharged to answer your questions.

How you benefit from our Meds-to-Beds Program:

- When you opt into the Program, medications are delivered directly to your bedside before your discharge.
- Your medications are submitted to your insurance for authorization prior to delivery to your bedside, so you know the costs of your medications before you leave the hospital.
- Providers can tailor the discharge medications to your insurance coverage, providing the lowest costs possible.
- We ensure there are no conflicts between your new medications prescribed at the hospital and those you already have at home, giving you peace of mind.
- You can proceed directly to the comfort of your home where you'll finish your recovery with your medications conveniently available.
- The service streamlines your recovery by preventing potential medication interruptions.
- On an ongoing basis, refills can either be forwarded to your preferred pharmacy or we can continue filling them for you.
